

Results of GO-WV first board election shared

The Gas and Oil Association of WV, Inc. (GO-WV) has successfully elected its first 15-member Board of Directors who will begin serving staggered terms of one to three years following the Summer Meeting. Over time, all board positions will have three-year terms. Successful candidates are listed by industry category.

Conventional Producers:

- *Ben Sullivan* (3-year term)

Ben Sullivan joined Diversified Energy Company PLC, a FTSE 250 company listed on the London Stock Exchange with operations in 9 U.S. States, in 2019 as Executive Vice President, General Counsel, and Corporate Secretary, with oversight of the company's law, land/real estate, community relations, and policy engagement functions. He built the law, corporate secretarial, and govern-

ment affairs departments from the ground up. Mr. Sullivan spends a great deal of his time serving as advisor and counsel to Diversified's CEO and Board of Directors on ESG matters, governance, risk considerations, financings, and acquisitions. He helped lead the Company's design of governance policies and processes and has significant international experience with governance, regulators, and capital markets matters. Mr. Sullivan works with the Board and CEO on executive compensation planning as well as recruitment, vetting, and on-boarding of new independent Board members and has significant experience with negotiating complex and bespoke financial arrangements, including asset backed securitizations. He has served as co-lead on multiple public equity raises, and on significant acquisitions and divestures totaling more than \$1.5 billion. Mr. Sullivan assists in oversight of interactions with

Intersection of wildlife and environmental regs

What does the West Virginia oil and gas industry have in common with freshwater mussels, how the federal government chooses to define the term "habitat," and drilling activity on federal lands in the west? Quite a bit, actually. As explained below, recent developments on each of these topics intersect with the regulatory programs that govern oil and gas operations in West Virginia.

WVDNR Mussel Guidance

On June 23, 2022, the West Virginia Division of Natural Resources (WVDNR) published final guidance reflecting the agency's recommendations for other state and federal government agencies to consider when issuing environmental permits authorizing activities that may impact freshwater mussels. Why does this matter to the West Virginia oil and gas industry? Because the guidance

hopefully resolves a long running effort to address what some viewed as improper efforts by the WVDNR to directly regulate oil and gas operations.

In addition to various permits required by the West Virginia Department of Environmental Protection (WVDEP) and the United States Army Corps of Engineers (Corps) for activities that impact certain streams,

operators are required to obtain a "right of entry" permit from the WVDNR before any disturbance may take place in or under certain size streams. This permit stems from the State of West Vir-

We are grateful to you all

As we approach the end of our terms as Co-Presidents of the Gas & Oil Association of WV, we are grateful to all of you, the members of this new, vibrant, and impactful organization.

The last two years, as we all have worked to create and shape GO-WV into West Virginia's leading membership and advocacy organization, have seen many challenges. These challenges, whether market-based, regulatory, or related to the internal evolution and maturation of our growing organization, have been met head on and overcome; generating positive momentum propelling us forward.

As an industry and as a collective advocate for the energy we produce, one thing is clear: We are stronger together.

The war in Ukraine has upended global energy markets and the demand for natural gas and oil has never been greater. According to a recent poll by the nonpartisan Pew Research Center, large majorities of Americans support ramping up natural gas production as a means of exporting more energy to Europe. The survey indicates strong majorities across party lines, with 70% of Republicans and 55% of Democrats in favor of increasing natural gas exports.

Thankfully, our state's political leadership share this sentiment and they are doing all they can to overcome barriers to development.

In a recent U.S. Senate Energy Committee hearing, Senator Joe Manchin stated, "To deny or put-up barriers to natural gas projects and the benefits they provide, while Putin is actively and effectively using energy as an economic and political weapon against our allies is just beyond the pale."

Senator Capito, our Congressional delegation, Governor Justice, and legislators from across the state are engaged in numerous initiatives to enhance our ability to produce the energy America needs.

The unity and cohesiveness we enjoy as an industry in West Virginia is necessary now than ever before. It is up to us and our colleagues in other states to help maintain American energy independence while supplying our allies with the fuel they require to power and defend their countries.

We have no doubt that we will meet the challenge.

In doing so, and in recognition of National Safety Month which occurred in June, let's take the opportunity to communicate the importance of operating safely with our stakeholders and employees. Our industry in West Virginia is known for cultivating and maintaining a culture of safety. Let's keep it going.

Finally, we would like to express our gratitude to the GO-WV Board of Directors for their tireless efforts to unite our industry and execute on industry priorities. Thank you, also, to all members for

We are grateful

CNX Mentorship Academy celebrates its successful first year with graduation ceremony

The Mentorship Academy is an initiative of CNX Foundation and part of CNX's commitment to investing in its local community. Designed for high school students who do not plan to immediately attend a four-year college, the Academy is focused on providing urban and rural youth from economically disadvantaged regional Appalachian communities with greater opportunities—helping provide these young adults a bridge to family-sustaining careers. Following the mentorship program, students will have developed new relationships with peers and business leaders in their area, a new excitement for the region's career opportunities and an understanding of how to pursue those careers.

CNX Resources President and CEO Nick Deuliis addressed the inaugural CNX Foundation Mentorship Academy Class at their June 1, 2022, graduation ceremony. "I look at you and I see me," Deuliis told the students. "You are me. I am you. Want to know why this region is the greatest place in the world and why I stayed here? Look around this room at these great people. Question answered." He also told the graduates, "This is not a drill. This is life. You get one shot. Time to make the most of it."

The inaugural first class of the CNX Foundation Mentorship Academy graduated with flying colors after completing a year of workshops, networking, building life skills and exploring career pathways.

[Check out the music video](#) the students made in honor of their year.

Following this successful first year, the Academy is now working to expand the program to ensure every school district in every disadvantaged community in the region is aware of its offerings and format. CNX Foundation envisions the program being replicated by others in Appalachia, resulting in a stronger, more prosperous middle class.

The program brought in local partners from a variety of industries, including restaurants, energy corporations, a professional sports team, contractors, local building trades and two community colleges. This took the program from a great idea with lots of potential to examples of real world expertise.

From the Burd's Nest: Time flies when you're having fun

This title phrase refers to the phenomenon that time appears to pass more quickly when one is engaged in something they enjoy. It's a way of explaining away the fact that the best things go by quickly and are over before one knows it.

With that said, it is truly impossible to believe that July 2022 marks the beginning of my 21st year as executive director of the Association. And what a ride it has been—good and bad! Thankfully, the “good” has well outweighed the “bad.”

The Good Stuff:

My Family: Where else could I possibly start?

Each of you reading this understands the sacrifice we all make to serve this industry and the effort it takes to balance that service with our family! Chasing around in the oilpatch all day, every day, is hard and very time consuming. We really need to have those around us who understand. So, thanks to Leone, my wife and my two sons, Charlie and Nathan, for putting up with the all the late nights, the early mornings, the grouchy demeanor and, most recently, since the onslaught of working remotely, my often times working from the dining room table and expecting you to be ultra-quiet while I conduct business!! LOL and I love you all.

My staff: The number one place to start here is with Lori Miller Smith. Lori is our Director of Administrative Services, our Meeting Planner and administers the GO-WV Insurance Program. Well before I arrived in 2002, Lori had established herself as a top industry professional and had earned that respect through years of dedicated service to IOGAWV and in private industry. Then, as now, she does an outstanding job of managing the staff, planning meetings, overseeing and building the most successful association insurance plan in West Virginia and putting up with me! Back in 2002, I remember telling her after my second interview for the executive director position at IOGAWV that I was the right person

for the job. I think I was trying to convince myself more so than her!! But here we are 20 years later.

In addition, along the way, I have also had the privilege to work alongside several other great staffers who have moved on to pursue other things. It would be unfair to not recognize Dee Beane and Tammy Stuck who were with me at IOGAWV. And we can't forget Rebekah Hogue and Jennifer Cox who steered the ship at WVONGA. I know both as true industry professionals from our joint association and legislative activities prior to the merger. While moving on to other endeavors, these four former employees served the Associations with distinction and honor. It was a privilege to work with them—some longer than others. That leaves my current staff, Katie McCracken and Jordan Bonnett, to round out our current team. Both are extraordinarily capable and stay very busy serving you, our members, in all ways possible.

My Leadership: Goodness, what a plethora of great leaders I have had to guide and direct me over the years. While way too many to attempt to name here, I can say...from top to bottom, they have been the best of the best. They too are required to serve more than one master; that includes the interests of their individual companies and the collective interests of the industry. Without hesitation, I can absolutely say I have never witnessed a Board decision made that has served one individual to the disadvantage of the others. While the debate may be long and sometimes “very honest,” in the end the right decision gets made. Although I do not have a vote in Board and Association matters, I take great pride in commending my past and current leadership for their insight into the issues and outcomes rendered. They have my sincere thanks and admiration.

Still time to register for GO-WV 2022 Summer Meeting

Bring the family and join your friends for the 2022 GO-WV Summer Meeting at The Greenbrier in White Sulphur Springs, West Virginia. You won't want to miss the excellent lineup of speakers during the industry presentations on Monday and Tuesday. The fun of GO-WV's Annual Summer Meeting takes place August 7-9 and you won't want to miss the good times awaiting you!

Golf tee times are available Sunday morning from 11:07 a.m. to 12:37 p.m. on the Greenbrier Course.

Sunday evening is the western-themed welcome reception and banquet atop Kate's Mountain. Come enjoy our traditional buffet of lobster and filet mignon. The Josh Stewart Band will be providing entertainment for this popular comfortable and casual event.

Industry presentations and business session begin on Monday from 9:00 a.m. to 11:00 a.m. in the Eisenhower Room. Guest speakers will include leaders from both industry and government.

Monday is filled with sporting events, as well, with something for everyone.

- The morning begins with the men's and women's doubles tennis tournament from 9:00 a.m. to 11:30 a.m. at the Tennis Club.
- The Trap & Skeet Tournament will take place at The Greenbrier Gun Club on Kate's Mountain Monday, August 8, with shooting times available from 9:30 a.m. to 5:30 p.m. Practice times will be available on Sunday. Please call (800) 624-6070 to make practice and tournament reservations at the Gun Club.

Summer meeting

Find experts to follow

When I graduated from WVU, my first job was in Michigan as an engineer for Halliburton. The manager dropped six large binders on my desk, saying, “Here is what you need to know.” Engineering education taught me how to learn new concepts and put pieces together to solve problems. I was dumb enough back then to think I was smart because I had an engineering degree. Everyone in our facility except for me and the District Manager learned everything they knew from field experience, not a book. To be good as an engineer I needed to learn from the field people’s years of experience. The hands found trusted experts to follow. These leaders advanced because of their successes. They were the experts. If something unexpected happened on a wellsite, they were the men who would still get the job done and bring everyone home safely. They delivered positive **results**.

How do we know if someone is an expert we need to listen to and follow? *An expert is defined as someone who has a broad and deep understanding and competence in terms of knowledge, skill and experience through practice and education in a particular field.* This dictionary definition doesn’t define how we know if someone has knowledge, skill and experience. I believe experts need to have a track record of success in their particular field.

My daughter, Dannielle, is my running coach. I consider her an expert in the field of distance running because of her success running marathons and half-marathons. (She won her age group in Toledo recently.) But also because of her success in training hundreds of others including some who are old like me, to successfully run marathons and half-marathons injury-free. It’s not just what an expert knows; it is their ability to turn knowledge into success.

Lynnda and I have been married for 47 years. We follow Dr. Willie and Dee Jolley’s webinar at www.ajollemarriage.com every Monday night at 9 pm, *Make Love, Make Money, Make it Last*.

Willie and Dee have been married for over 36 years and haven’t had an argument for over 35 years. Lynnda and I know how to have a successful marriage based on our experience. Willie and Dee are on another level. They are experts with a record of success in the area of successful marriage and are marriage coaches using their information on a global basis to help others to have successful marriages.

The most attended sessions at conferences like the World Petrochemical Conference (WPC) and DUGEAST are when CEOs speak. People want to know what these successful individuals think and want to learn from them. CEOs are experts in a field who have been successful and are using their expertise to run large organizations.

On May 18th the North American Electric Reliability Corp. (NERC), issued its Summer Reliability Assessment. This report presents a forward-looking evaluation of power generation resources, transmission and energy sufficiency across North America. Basically, it tells us if there will be enough electricity to meet the country’s needs. The report warned of mounting reliability risks and urges preparation for a challenging summer: “Roughly two-thirds of the USA faces heightened risks of power outages this summer.” We may experience power outages and rolling blackouts if temperatures spike. FERC commissioners said the country may be shifting to weather-dependent energy sources too quickly. Commissioner Mark Christie said, “We’re heading for a reliability crisis.”

Shutting down coal, nuclear and natural gas power plants, replacing them with weather-dependent energy is irresponsible and unacceptable without a dependable backup. When the power goes off, people die. We lost a friend during the derecho that hit Charleston a few years ago. Power was lost for days. That power loss couldn’t have been prevented. What happened in Texas last year was foreseeable and preventable.

WeatherBELL hurricane impact forecast

For more information about WeatherBELL's services and to get the hot-off-the-press forecast updates, please visit our website www.weatherbell.com or contact us at sales@weatherbell.com.

Our updated forecast for hurricane season continues to call for another active and impactful year for the Atlantic basin. We still expect 18-22 named storms, 6-10 hurricane, and 2-4 major hurricanes.

The highest chance for impacts will be centered on the U.S. Southeast Coast. The big change from our first outlook is that while we still anticipate storms to be their strongest relatively close to North America, conditions will also be more favorable in the Deep Tropics.

With the updated forecast, the Caribbean and Bahamas will see elevated activity, and these storms, along with homegrown ones, will have their greatest impacts in the southeastern U.S..

My Lobby Team: Almost harder than trudging the oilpatch is trudging the marble floors, hallways and meeting rooms at the State Capitol building. Trust me, after 60 days and nights of Legislative Session the ol' knees, ankles and feet are pretty much shot!! But the work we seek to accomplish is well worth the inconvenience. My thanks to Phil Reale, Jim Fealy and Daniel Hall for their hard work.

My Committee Chairs: These volunteers are to be commended for the time and effort they expend to guide the discussion and move the Association in the appropriate directions. My sincere thanks to my many chairs for their guidance on the legislative, regulatory, environmental and governmental affairs matters that mean the most to our members.

My Legal Counsel: For 20 years, George Patterson (Bowles Rice) has kept me on the straight and narrow path and protected the Associations from any form of impropriety—and what a great job he has done! Not only is he my legal counsel, but I consider him a personal friend.

You, my members: One cannot survive the rigors of a 20-year career in association management without the help, aid, and assistance of the membership. The times I have asked for your guidance and advice on topics for which I had little to no knowledge cannot be counted. No one walks this journey alone. You have made me better in countless ways. Thanks for your long-time support and friendship.

The Not So Good Stuff:

Our Losses: In my 20 years with IOGAWV and now GO-WV, we have fought the good fight on dozens and dozens of issues of importance—some we won, some we retreated to fight another day. Those losses seem so distant to the loss of some of this industry's true icons here in West Virginia and the region. While I can't and won't attempt to name all, a few stand out as deserving of my special recognition:

Tom Dunn. Tom was a man of honor who understood the importance of the oil and natural gas industry here in West Virginia. He

was an outstanding individual who served as a leader to both IOGAWV and WVONGA. It was virtually impossible to refuse any “ask” Tom might have made to you because you knew he was always the first to “give.” Tom and I traveled to many IPAA meetings together across this great nation. His insight on the industry was greatly respected and sought by many. It's only fitting the Tom Dunn Energy and Leadership Academy is named in his honor. I miss you my friend...and to you a hoist a Dewars—or two!

Duncan Malcolm: It was over dinner at the 2002 Summer Meeting (my first) that I discovered Duncan and my son Nathan shared the same birthday (September 23). Duncan instantly took a liking to him and my family. Many of our conversations started with his asking about them. It didn't take much time or effort to become friends with Duncan. Mr. Malcolm soon became “Scotty.” It is easy to see why IOGAWV proudly named a scholarship in his honor.

Corky DeMarco. Corky was, well...Corky! When I came on the scene at IOGAWV in 2002, WVONGA was also searching for a director. I was a summer hire and Corky shortly followed me at WVONGA that same fall. From his previous journeys, he knew everyone at the Capitol. He befriended me and taught me the ropes at the legislature. Corky placed others before himself. Like all, I was shocked to hear of his passing in 2016. Since the merger, we have dedicated a wall in the GO-WV office to honor WVONGA and its traditions. A picture of Corky is a center piece of that display.

It is so true...time does fly when you're having fun and I can assure you it's been a very fast, fun and eventful 20 years! It seems like just last week I was making that first drive into the IOGAWV offices at the old Daniel Boone Hotel building on Capitol Street—240 months ago!!!

But there is still much work to do, and I look forward to my continued commitment to serve GO-WV, the oil and natural gas industry and you, my great members.

Who are the “experts” the country is following who make these decisions? California started having blackouts after shutting down nuclear and natural gas power plants in favor of weather-dependent energy. Were the people in California who recommended this plan experts with a track record of success? Probably not. I can’t think of any place where weather-dependent energy works without a backup. It can work in normal conditions, but fails in extreme heat or cold and at night, requiring immediate backup. The USA has natural gas in abundance and leads the world in its production. It is an excellent back up. Why wasn’t it part of the plan?

Global GHG emissions increased 6% in 2021 according to a March 2022 IEA report. China was responsible for most of the increase, followed by India. **U.S. emissions were down 4%.** The EU was down only 2.4%. The USA, according to IEA, is the only country meeting the Paris Agreement targets. Why do many in government and “environmental” groups want us to follow Europe’s example? Are they experts in energy? What successes can they show? Why would any leader concerned about the environment follow anyone but the USA because of its success? Europe’s reliance on wind last year caused outages and price spikes. Europeans pay over five times more for natural gas than U.S. consumers. They also rely on Russia for 40% of their natural gas but don’t count the Russian emissions to produce it.

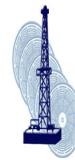

One of Europe’s solutions to Russian gas is to double down on weather-dependent energy. They also plan to get most of Europe driving EVs, never explaining how people will afford to buy them. The EU conveniently overlooks the large open-pit lithium, nickel and cobalt mines in Africa, Asia and South America and the pollution they cause. They also ignore the radioactive lakes in China from the production of rare earth metals so Europe can have EVs. Who are the “experts” that recommended this? If I hadn’t heard this from multiple people at multiple conferences and in the media, I wouldn’t have believed it.

None of these ideas have ever been tried even on a small scale like taking a college campus or a small town off the grid and demonstrating their theory. How many E&P companies would try a new chemical or process on ALL of their wells

unless they had first seen it work successfully on a small scale? Abundant affordable domestic energy is one of many things required for freedom. Europe lost some of theirs when they became dependent on Russia for much of their energy.

The Green New Deal and most of what is being promoted to “save the world” is entirely based on theory. Government and people in academia are good at theory. They are not experts to be listened to and followed until they can show success in the area of energy and the environment.

If climate change is as serious as we are being told, would you bet your family’s lives on people in government and academia? I would choose the American natural gas and oil industry made up of leaders and smart people who have a track record of success. The public needs to know.

- Golf tee times are available Monday on the Meadows Course from 11:37 a.m. to 12:27 p.m.
- The mixed doubles tennis tournament takes place from 1:30 p.m. to 4:00 p.m. Monday at the Tennis Club.

Monday evening features dinner on your own, so make reservations now. Following dinner, wear your GO-WV badge and head to the casino for our After Dinner Reception at 8:30 p.m. The Casino Night fun will feature a private GO-WV bar and the opportunity to enjoy an evening of your favorite casino games. Music and dancing

are also available.

Tuesday begins with our second set of industry presentations from 9:00 a.m. to 11:00 a.m. in the Eisenhower Room. Guest speakers will again include industry and government leaders.

The festivities then move back outdoors for more sporting fun. The Trap & Skeet Tournament enjoys its second day of competition from 9:30 a.m. to 3:30 p.m.

The shotgun-start golf tournament will take place on the Old White course Tuesday, August 9, beginning at 12:30 p.m. To sign up for the tournament, please contact Joanna Honaker at (304) 536-4919 or joanna_honaker@greenbrier.com.

For those who aren't golfing, we have a special membership event. Learn about the art of making chocolate from the candy makers at The Greenbrier. We will meet at 11:00 a.m. at the GO-WV registration area off the upper lobby. Lunch will be provided. You will return to the rest of your day's activities by 1:00 p.m. The fee for this special event is \$200 per person.

Your Summer Meeting adventure concludes Tuesday evening with an awards reception at the Outdoor Pool from 7:00 p.m. to 8:00 p.m.

A luau dinner will follow the awards reception, also at the Outdoor Pool, from 8:00 p.m. to 10:00 p.m. This special evening will conclude with music, dancing and fireworks!

As a reminder, GO-WV will be adhering to all COVID-19 guidelines in place at the time of the meeting as shared by the CDC, the State of West Virginia and The Greenbrier.

To make golf reservations or to make reservations for Trap and Skeet, call 1-800-624-6070. You do not need to make reservations for the Tennis Tournament (just show up).

Please call Jessica Dowdy at (304) 536-1110 ext. 4943 or jessica_dowdy@greenbrier.com to make your room reservation by June 24.

Summer Meeting registration is open online at www.gowv.com. You can also use the sponsor form on page 20 and the registration form on page 21. See you there!

state, federal, and international regulators and officials.

Prior to joining Diversified, Mr. Sullivan worked with Greylock Energy (an ArcLight Capital Partners portfolio company) and its predecessor as Executive Vice President and General Counsel, with supervision of many business units. Prior to his tenure at Greylock, he worked as counsel for EQT Corporation as well as with a private law firm. He is a member of the leadership and Board of Directors of several commerce, legal, and industry groups. Mr. Sullivan graduated from the University of Kentucky with a B.A. degree in History and received a J.D. degree from the West Virginia University College of Law. He holds licenses to practice law in several States, including Pennsylvania and West Virginia.

• *Jeff Isner* (3-year term)

Jeff Isner is the CEO and co-founder of Pillar Energy, LLC located in Charleston, WV. Pillar Energy owns and operates roughly 1800 wells in WV, VA and OH and has 30 employees.

He received his B.S. in Economics and International Business from West Virginia Wesleyan College as well as his MBA.

He previously served on the IOGA board for 2 terms from 2014-2017 and 2018-the merger of the two associations. He co-chaired the initial Producer Issues Committee as well as chaired the Communication and Education Committee. As chair of the Communication and Education Committee, he introduced IOGA's inaugural WV Science Teacher Conference planned in the summer of 2018. He currently serves as the co-Vice President and Program Chair for GO-WV.

Jeff resides in Ripley, WV with his wife, Jessica, and their children, Ava, Cohen and Cason. He attends Calvary United Methodist church in Ripley.

• *Scott Freshwater* (2-year term)

Following in the footsteps of his father, grandfathers and grandmother, J. Scott Freshwater is involved in all aspects of the oil and gas industry from the wellhead to burner tip. He

is the co-owner of Reserve Oil & Gas (a conventional well driller and producer in central WV), ConServ (a fully integrated oil and gas related contracting firm doing business since 1970), United Gas Pipeline (a midstream gathering pipeline system) and various real estate and other holdings.

His work career began in the field in 1987 working on well servicing, well cementing, well plugging and pipeline construction projects for a predecessor to ConServ. From 1989 to 1995, he attended West Virginia University and received a BS and MS in Civil & Environmental Engineering while working summers at ConServ and completing an internship at Columbia Gas/Gulf Transmission (now TC Energy). Freshwater returned to ConServ on a full-time basis in 1996 and directed the diversification of ConServ into the environmental contracting services arena while increasing ConServ's area of operations to encompass the mid-Atlantic region. His technical expertise coupled with his field experience in all facets of the oil and gas industry prepared him to lead the long-term growth of ConServ which today has three distinct service groups: Well P&A Services, Compressor Station Services and Pipeline Services.

Freshwater currently serves on the Board of Directors of First Neighborhood Bank (where he also Chairs the HR Committee), as Treasurer/Trustee of the National Youth Science Foundation, as a member of the Board of the Clay Center for Arts and Sciences of WV, and as a member of the Executive Board of the Buckskin Council of the Boy Scouts of America (BSA). He is Past President of the Allohak Council (WV/OH) of BSA, a Past President of the Independent Oil and Gas Association of WV (IOGAWV), and a Gold member of the Mountain State Chapter of the Young Presidents Organization (YPO). He currently is a member of the Energy Workforce & Technology Council's (a national organization formerly known as the Association of Energy Service Companies) Well Services Committee and Chairs the Orphan Wells Best Practices Workgroup.

He has been recognized by the WV State Journal as a "Generation Next: Forty Under Forty" recipient in 2008, was named a 2014 "Young Gun" by WV Executive magazine, received the Silver

New board members

Continued on page 15

Beaver Award from BSA and the “Gunslinger Award” from IOGAWV for his distinguished service.

Freshwater resides in both Spencer, WV and Charleston, WV. He is the proud father of Isaac Samuel (Ike) Freshwater (7 years old) and Derek Alexander (D.A.) Freshwater (19 years old, currently studying civil engineering at WVU) and who is preparing to join the family business interests and the oil and gas industry.

• *Sam McKown* (1-year term)

C.I. “Sam” McKown is president and owner of various entities that operate under the trade name McKown Associated Natural Resource Companies which own conventional oil and gas wells; as well as hold mineral, land and timber interests in Central and Southern West Virginia.

He maintains offices in Roane County and Charleston.

While working as an engineer intern for Conoco in the summer of 1987, Sam and his parents started the business by purchasing a small independent oil and gas company. Upon graduating from WVU in 1988 with a Bachelor of Science degree in Petroleum Engineering, he assumed complete responsibility for the operation and remains in that role today.

Sam currently chairs the GO-WV Insurance Committee, is a Trustee of the GO-WV Insurance Trust, serves on the Environmental and Safety Committee, Producers’ Issues Committee and various other Sub-Committees of the organization.

Previously he was a Board Member of IOGA, Chairman of the Producers’ Issues and Membership Committees as well as Vice-Chairman of the Environmental and Safety Committee.

In addition to currently serving on the Board of the National Stripper Well Association, he serves or has served on various other private, public and non-profit boards and committees and is a member of numerous professional organizations.

He and his fiancée Dayana Caro live in Charleston. Sam has three biological children; Isaac, Quincy and Victoria; a fourth one that he considers a son, Isaac Caro; and a grandson Charlie.

In his spare time, he enjoys flying, mountain climbing and snow skiing. Sam is an avid reader and eternal fan of American History.

Non-Conventional Producers:

• *Maribeth Anderson* (3-year term)

Maribeth Anderson is the Director of Government Relations for Antero Resources. She came to Antero at the end of 2017, after serving in similar roles for Southwestern Energy and Chesapeake Energy since 2007. Prior to entering the energy sector, Maribeth was the news director for WSAZ Television.

Maribeth has served in industry leadership roles across four states, as the former board President for the WV Oil and Natural Gas Association, the current Vice President of the Gas and Oil Association of WV (GO-WV), and a board member of the Ohio Oil and Gas Association and the Ohio Oil and Gas Energy Education Program. In former roles, she was elected to the boards of the Oil and Gas Associations in Kentucky and Virginia. She is currently on the executive committee of the WV Chamber of Commerce.

A graduate of Marshall University, Maribeth lives in Huntington with her husband and has two children in college.

• *Chris Weikle* (3-year term)

Chris Weikle was born in Charleston, West Virginia in 1981 to the wonderful parents of Phil Weikle and Debbie Phillips. Chris went on to grow up in Teays Valley where he lumbered through the Putnam County school system graduating from Winfield in 1999. Chris then spent eight great years in Morgantown attending West Virginia University. While eight years seems like a lot, he did go on to graduate in 2003 with a B.S. in Political Science and in 2007 with a J.D. from West Virginia University.

After graduating law school Chris left West Virginia for a year to live in the coastal Charleston. He quickly realized the error of his ways and returned to West Virginia to work in the legislature for the

New board members

Continued on page 16

Joint Committee on Government and Finance. After that Chris was proud to work on the campaign and then serve in Governor Earl Ray Tomblin's administration as Deputy Director of Public Policy. While in the governor's office, Chris dedicated himself to education, energy and government efficiency.

Chris reluctantly left the Governor's office to join LGCR Government Solutions as the Deputy Director of Government Relations and Advocacy. At this firm he represented clients ranging from Fortune 500 companies to small non-profits.

Chris is now the Senior Manager of Government Affairs for Southwestern Energy. He has served on the Board of Directors at WVONGA, IOGA and GO-WV. He has been married to his wife Kelly Matheny Weikle for ten wonderful years. Kelly and Chris have been blessed with two magnificent kids, Ainsley Jane Weikle (7) and Landon Arlo Weikle (4 years) that keep Kelly and Chris on their toes.

• *Brett Loflin* (2-year term)

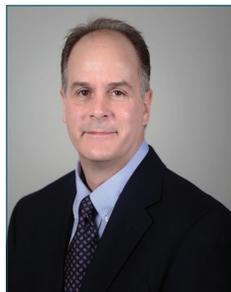

Brett Loflin is the Vice President of Regulatory Affairs for Northeast Natural Energy LLC based in Charleston, WV. Prior to joining Northeast in August of 2010 he served as Director of Regulatory Compliance for Atlas Energy and Manager of Regulatory Compliance for Chesapeake Energy. Mr. Loflin also worked for over 20 years as the staff engineer and director of the West Virginia Oil and Gas Conservation Commission.

Mr. Loflin is a past president of IOGAWV and has served a combined three terms on the IOGAWV and GO-WV Board of Directors.

Mr. Loflin is a West Virginia native and a 1982 graduate of West Virginia University with a degree in Petroleum Engineering. He resides in Charleston, West Virginia with his wife Beth and has two children Evan and Katherine and two grandchildren, so far.

• *Holly Hannold* (1-year term)

Holly Hannold is the Public and Government Affairs Manager for XTO Energy, a subsidiary of ExxonMobil. She manages public affairs for XTO Energy's unconventional business in the

tristate region and manages government relations for ExxonMobil across Appalachia in Ohio, Pennsylvania, West Virginia, Kentucky, Maryland, Delaware and Virginia.

Holly currently serves as GO-WV's PR & Communications committee co-chair. Prior to the merger, she was involved with WVONGA as an executive board member, chairing the PR Committee and on the Energize Board.

Prior to joining ExxonMobil, Holly worked at Chevron for nearly 7 years where she held various roles in Northeast State Government Affairs, Corporate Marketing and Advertising, and International and Federal Affairs. Holly started her career working on Capitol Hill and in media affairs at the White House.

Holly holds a Bachelor's Degree in International Relations from Liberty University and a Master's Degree in Integrated Marketing and Communications from West Virginia University.

Pipeline Sector

• *Jason Harshbarger* (3-year term)

Jason Harshbarger is the WV & OH State Policy Director for BHE GT&S (Berkshire Hathaway Energy Gas Transmission and Storage) for stakeholder engagement and relationship development with local elected and municipal officials, government agencies, community organizations and business groups. He also is responsible for the company's philanthropical program. Harshbarger is a 1997 graduate of Marietta College with a degree in Environmental Science and an emphasis in Petroleum Engineering. He has 25 years of experience in the energy sector and is a past member of the WV House of Delegates where he served on the following committees: Chairman of Natural Resources, Judiciary, Energy, Industry & Labor and was an Assistant Majority Whip.

He currently serves on the Board of Directors for: the Gas and Oil Association of West Virginia (GO-WV), American Red Cross Central Appalachia Region, Discover the Real West Virginia Foundation, Inc., WV Chamber of Commerce, WV Roundtable, Harrison County Chamber of

New board members

Continued on page 17

Commerce, West Virginia Damage and Prevention Board, and the Governor's One Shot.

Harshbarger has worked in several areas of the energy sector from engineering to environmental compliance. Upon graduation, he began his career in the Gulf of Mexico performing formation evaluation and directional drilling then in 2000 he moved to Akron, OH to work in the environmental department at FirstEnergy. He later transferred to the Sammis Power Plant where he oversaw permitting and later becoming unit engineer.

In October 2005, Harshbarger started his career with Dominion Energy in the environmental department, managing compliance for multiple gas transmission divisions and later in the gas storage department where he maintained the integrity of gas storage assets. In 2019 he was named to his current role as the State Policy Director. In November 2020 Jason moved over to Berkshire Hathaway Energy due to the acquisition of the natural transmission and storage assets from Dominion Energy.

Harshbarger has been active in the community, where he has served as a volunteer for the Ritchie County 4-H Program, the Mid-Ohio Valley Technical Institute (MOVTI) Advisor Committee, the Ritchie County Economic Development Authority Board, and the West Virginia Hugh O'Brian Youth Leadership as past president and corporate board treasurer.

He was also selected as a member of the elite Young Guns Class of 2018 by WV Executive Magazine for his dedication to lifelong learning and service to the State of West Virginia.

Jason and his wife Michelle live on their family farm that dates back to the mid-1800's near Pullman, WV with their daughter Mackenzie.

• *Jim Crews* (3-year term)

Jim Crews, who became Vice President of Northeast Business Development for MarkWest Hydrocarbons (wholly owned subsidiary of MPLX) in October 2011 has held various positions with TC Energy-(and its predecessors NiSource Gas Transmission and Storage, Columbia Gas Transmission-TCO) from 1995 to 2011. Most recently he was Managing Director of NGT&S's

Supply & Origination group and was responsible for building the Columbia Midstream Services subsidiary to provide unregulated gathering and processing services in the Appalachian Basin. During his tenure at Columbia he was Director of Commercial Operations, Manager of Gas Control, Manager of Marketing, Manager of Business Development, and Engineering Supervisor. He has spent his entire professional career in the energy industry. From 1982 to 1985 he worked at Cabot Oil and Gas' drilling and production division in Charleston, West Virginia. In 1985 he moved to the nuclear power industry and served as a field service engineer for Babcock and Wilcox Nuclear Power in Lynchburg, Virginia. From 1987 to 1995 he worked in engineering, storage, and planning for Washington Gas Light Company in Washington D.C. Jim also served as president of WVONGA in 2010-2011.

Crews received a bachelor's degree in Petroleum Engineering from West Virginia University and is a registered professional mechanical engineer in Virginia and Ohio. He is a past President of the West Virginia Oil and Natural Gas Association (WVONGA), and currently serves as a Director on the Board of the Gas and Oil Association of West Virginia (GO-WV).

• *Stephen Furbacher* (2-year term)

Stephen Furbacher became Director Operations for Williams in January 2020. He is responsible for safely operating the company's gathering, processing and fractionation facilities in West Virginia and Ohio. Stephen is actively engaged in steering committee and councils for Wil-

liams including the corporate D&I Council, Maximo Strategy and Learning & Development. Prior to being named Director, Stephen held various operations leadership roles in West Virginia since 2015. Previously, Stephen served in business development roles supporting Williams' assets in Colorado, Louisiana and Texas. He joined Williams in 2008 as an engineer in Wyoming. He earned a bachelor's degree in mechanical engineering from Valparaiso University and a MBA from University of Denver. Stephen is actively involved in Junior Achievement and the

New board members

Continued on page 18

United Way of Upper Ohio Valley (West Virginia).

• *Aaron Thompson* (1-year term)

Aaron Thompson is the State Government and Community Relations Manager for TC Energy covering Kentucky, North Carolina, Ohio, Virginia, and West Virginia. A graduate of the University of Kentucky, Aaron served as Director of Special Projects for Congressman Andy Barr in Central Kentucky before serving as a Field Representative and Executive Director for Kentucky's Office of the Governor and Department for Local Government during the Bevin Administration. Aaron joined TC Energy in mid-2020.

Local Distribution Company

• *Craig Colombo* (3-year term)

Craig Colombo has over 38 years in the Oil and Gas Industry and is currently a Natural Gas Supply Strategic Advisor for Dominion Energy Services, in Richmond, Virginia. Craig has worked with Dominion Energy West Virginia (DEWV) for 34 of those years, where he has established and developing countless relationships with producers and individuals in the Oil and Gas Industry and the business community. During his years with the DEWV, Craig has been responsible for the procurement and contracting of natural gas supplies and the contracting of pipeline and storage capacity with multiple upstream interstate pipelines.

Service Provider

• *Kelly Moss* (2-year term)

Mr. Moss was a founding partner in Apex Pipeline Service, Inc. in 2006 and has served as President/CEO since inception. He was previously the Secretary/Treasurer and COO for S T Pipeline, Inc. from 1996 through 2005. Prior to that time, he worked for Columbia Gas Transmission from 1994 through 1996. From 1986 to 1994, he worked for various PVF wholesalers as a salesman and sales manager and worked for Bell

Mechanical as an estimator. He is active in many industry associations and is often used by industry leaders to gain a contractor's point-of-view on many issues. (Board of Directors – WVONGA 2007 to 2021, WVONGA Treasurer 2009 to 2021, GO-WV Board of Directors 2021 to present, GO-WV Treasurer 2021 to present). He graduated from South Charleston High School in 1984 and attended Marshall University from 1984 to 1987. He is married and has two children.

General Member

• *Tom Westfall* (1-year term)

Thomas D. Westfall is currently the Vice President of Gas Supply and Technical Services for Mountaineer Gas Co. which includes responsibility for gas supply, transportation and exchange, gas control, dispatching and engineering. He joined Mountaineer in 1994 as a plant utility worker and has held a variety of positions at Mountaineer Gas including customer service technician, supervisor of administrative services, operations engineer, manager of gas support services and manager of gas supply. In these positions, he has gained a wide variety of experience in operations, customer service, engineering, regulatory and gas supply. Westfall earned his undergraduate degree in mechanical engineering from WV Institute of Technology and a Master's of Science in engineering management from Marshall University. Tom lives in Charleston with his wife, Jennifer, and has two children, Dalton and Sydney, living in Morgantown.

ginia's claim to own the stream bed of certain waterways. Activities requiring a "right of entry" permit include installation of equipment to withdraw water for use in well completion or other activities.

Several years ago, WVDNR began attempting to impose conditions in "right of entry" permits that would regulate the design of certain stream crossings and impose restrictions on when and how much water could be withdrawn from a stream. These conditions were intended to minimize impacts on freshwater mussels, including those protected under the Endangered Species Act. After much discussion and negotiation between the agency and industry representatives concerning the propriety of such conditions, WVDNR agreed to publish either regulations or guidance on how to address freshwater mussels in the permitting process. Following a comment period on draft guidance published in the summer of 2021, WVDNR published the final guidance on June 23, 2022. In that document, WVDNR makes a number of recommendations for other agencies, such as WVDEP and the Corps, to consider during the consultation and coordination process associated with applications for environmental permits governing projects that may impact freshwater mussels. For example, WVDNR encourages the use of construction methods that minimize mussel impacts and recommends selection of project locations that avoid mussel populations. The guidance also speaks directly to horizontal directional drilling activities used to bore underneath streams rather than trenching through them. WVDNR also sets forth specific recommendations to restrict water withdrawals under certain stream conditions.

In addition to the guidance on the consultation process, WVDNR also revised its existing protocol to be followed by licensed divers when performing a stream bed survey to ascertain the presence and concentration of freshwater mussels. The survey protocol is a rather technical document that lays out the agency's views on how and where mussel surveys should be conducted in large streams, such as the Ohio and Kanawha Rivers, as well as proposed restrictions on in-stream dredging or construction activities de-

The intersection

Continued on page 20

pending on the results of a mussel survey. Those working in or around streams that serve as habitat for freshwater mussel populations should consult the guidance, which can be downloaded from the WVDNR’s website: <https://wvdnr.gov/plants-animals/freshwater-mussels/>.

Service Rescinds Definition of “Habitat”

Speaking of habitat, the United States Fish & Wildlife Service (Service) recently vacated the regulatory definition of the term “habitat” under the federal Endangered Species Act. Why is this relevant to oil and gas operators in West Virginia? This change could lead to areas in West Virginia being designated as “critical habitat” for a threatened or endangered species even if the species could not survive there, which would likely preclude development activities on or near those areas.

The Endangered Species Act precludes federal agencies from taking actions, including issuance of permits, that may adversely modify areas designated as “critical habitat” for species listed under the Act as “threatened” or “endangered.” The Act defines the term “critical habitat” to generally mean areas designated as essential to preserve or promote recovery of protected species regardless of whether the species is actually present in the area. The term “habitat,” however, was not itself defined in the Act or regulations until January, 2021 when a regulation published by the Service in December, 2020 became effective. (85 Fed. Reg. 81411). That regulation was in response to litigation challenging a “critical habitat” designation by the Service of an area where the relevant species could not survive under current conditions, which went all the way up to the United States Supreme Court. *Weyerhaeuser Co. v. United States Fish and Wildlife Service*, 139 S. Ct. 361 (2018). In making the designation, the Service reasoned that the area was once occupied by the species, and certain modifications could be made in the future that would allow the species to return to the area. The property owner challenged the designation arguing that an area could serve as “critical habitat” for a species if the area could not support the species as it exists – i.e. serve as “habitat” as that word is commonly understood. Both the district court and the court of appeals ruled

that an area did not have to be “habitat” (as commonly understood) to meet the statutory definition of “critical habitat.” A unanimous Supreme Court disagreed and remanded the case with instructions to the lower court to make a determination of whether the subject area would qualify as “habitat” for the relevant species.

In response to the *Weyerhaeuser* decision, the Service undertook a rulemaking effort to specifically define “habitat” for purposes of making “critical habitat” designations under the Endangered Species Act. After a lengthy comment period, the Service ultimately defined “habitat” as follows: “the abiotic and biotic setting that currently or periodically contains the resources and conditions necessary to support one or more life processes of a species.” Said another way, habitat means the conditions that presently or sometimes will support one facet of a listed species’ life processes (feeding, breeding, etc.). Under this definition, the Service could likely not designate an area as “critical habitat” unless the relevant species could survive in that area as it presently exists.

Immediately upon taking power, the Biden administration announced plans to evaluate a number of regulations promulgated during the prior administration, including those implementing the Endangered Species Act. In October, 2021, the Service proposed to rescind the regulation defining “habitat” and did so on June 24, 2022 (87 Fed. Reg. 37757). In the rulemaking, the Service readily acknowledged that “we are changing our position on some aspects of the rationale underpinning the definition’s adoption[.]” The current leadership of the Service determined that the regulatory definition of “habitat” adopted in early 2021 is “inconsistent with the conservation purposes of the Act” because it restricts the Service’s ability to designate certain areas as critical habitat – i.e. those areas where a species could not presently survive. According to the rulemaking announcement, rescinding the “habitat” definition will allow the Service “to designate unoccupied areas as critical habitat if those areas fit within any reasonable biological understanding of ‘habitat’ as established by the best available scientific data for a particular species, and if such areas are essential for the recovery of the species.” In other words, the Service should have more discretion in determining what qualifies as “habitat” when making critical habitat designations. This discretion is exactly what led to the critical habitat designation successfully challenged in the *Weyerhaeuser* case. The bottom line is that the Service has returned to the regulatory framework applied by the Service to designate an area where a protected species could not survive as critical habitat for that species. Couple this with ongoing efforts to list more and more species for protection under the Endangered Species Act, property owners and project developers should be concerned.

Cumulative impact of federal drilling permits on endangered species

In addition to potential impacts on critical habitat, the Endangered Species Act also requires federal agencies to consult with the Service to determine whether a proposed project may adversely affect listed species. Two anti-industry organizations have sued the United States Department of Interior and United States Bureau of Land Management challenging over 3,500 drilling

The intersection

Continued on page 22

advisory. tax. assurance.

© 2022 Baker Tilly US, LLP

permits issued for federal lands in New Mexico and Wyoming on the grounds that the agencies failed to consider the impacts of climate change and therefore impacts on certain endangered species. *Center for Biological Diversity v. United States Department of Interior*, No. 1:22-cv-01716 (D. D.C. June 15, 2022). Why should oil and gas industry in West Virginia care about this? Because the arguments advanced to challenge those permits also apply to environmental permits often needed for oil and gas operations in West Virginia.

The groups who filed the lawsuit allege that the federal agencies failed to consult with the Service prior to issuing the permits concerning the cumulative impacts of all the approvals on climate change and associated effects on “climate-imperiled” species listed for protection under the Endangered Species Act. According to the complaint, climate change is a primary driver for the decline of approximately 150 species. The complaint further alleges failure to consider the cumulative effects of the permits violates the National Environmental Policy Act (NEPA) and the Federal Land Policy and Management Act. The groups ask the court to vacate all the drilling permits and prohibit the agencies from approving any additional drilling permits until they have “fully complied” with the cited statutes.

Those in West Virginia should be concerned with this challenge for several reasons. First, while there is not much drilling on federal lands in the state, federal Clean Water Act section 404 “dredge and fill” permits are often required to build roads and pipelines associated with oil and gas development in the state. These permits, issued by the Corps, are subject to the consultation process under the Endangered Species Act. One of the same groups suing to vacate the federal drilling permits has a case pending since May, 2021 in Montana alleging that the Corps failed to adequately consult with the Service prior to issuing the section 404 nationwide permit used for pipelines (known as NWP 12). *Center for Biological Diversity v. Spellmon*, No. 4:21-cv-00047 (D. Mont.). A decision on the merits of that challenge could be issued soon.

Second, imposition of a “cumulative effects” analysis could displace a case-by-case evaluation of each individual project. Deeming a certain

category of projects to be detrimental to climate change, and thus harmful to “climate-imperiled” species, could preclude approval of all permits for individual projects in that category.

Third, the incremental impact of one or more projects, or even a category of projects, on climate change, much less individual species, is difficult if not impossible to ascertain. Are bureaucrats at the Service qualified to make such decisions? Should they be making policy judgments about the net effect of a natural gas development project on climate change?

Fourth, the Service recently published a proposed rule to further expand its authority under the Endangered Species Act. On June 7, 2022, the Service published a proposal to revise its regulations to authorize the agency to create populations of threatened or endangered species in areas where those species have never been known to exist. (87 Fed. Reg. 34625). Historically, the agency has authority to re-introduce listed species into geographic areas within the species probable historical range, which are known as “experimental populations.” In other words, if the agency has evidence that a listed species once existed in an area, the Service can release the species to that area in an attempt to re-establish a population. The Service now seeks to expand the scope of eligible geographic areas to include locations outside of the species’ known historical range. The Service cites the impact of climate change on species and their habitats as justification for the proposed rule change. Under the proposed revised regulation, property owners and developers could face significant delays, or even outright cancellation, of projects in areas where the Service has chosen to attempt to establish a population of listed species that never before existed there. Comments on the proposed rule are due by August 8, 2022.

Conclusion

State and federal actions addressing wildlife management, especially under the Endangered Species Act, continue to pose challenges for the oil and gas industry. Operators would be wise to monitor regulatory and litigation developments, and to engage their consultants and attorneys early in the planning process to address anticipated issues arising under the Act.
