

GO-WV members elect seven directors

GO-WV members elected seven new members to the GO-WV Board of Directors, including three Producers, two Pipeline Operators and two General Members. Directors will serve two- or three-year terms as prescribed by the Board during the transition from 15 to 17 Board members. Going forward, all future directors will be elected to three-year terms. All those elected will begin their term beginning immediately following the 2024 Summer Meeting in August.

The two retiring Board members are Scott Freshwater, Reserve Oil & Gas, and Stephen Furbacher, Williams Companies.

Producer Sector

Brett Loflin (Unconventional) is the Vice President of Regulatory Affairs for Northeast Natural Energy LLC based in Charleston, WV. Prior to joining Northeast in August of 2010 he served as Director of Regulatory Compliance for Atlas

Energy and Manager of Regulatory Compliance for Chesapeake Energy. Loflin also worked for over 20 years as the staff engineer and director of the West Virginia Oil and Gas Conservation Commission. Loflin is a past president of IOGAWV and has served a combined three terms on the IOGAWV and GO-WV Board of Directors. He is a West Virginia native and a 1982 graduate of WVU with a degree in Petroleum Engineering. He resides in Charleston, West Virginia with his wife Beth and has two children and two grandchildren.

New directors

Register now for Aug. 4-6 Summer Meeting

Bring the family and join your friends for the 2024 GO-WV Summer Meeting at The Greenbrier in White Sulphur Springs, West Virginia. You won't want to miss the excellent lineup of speakers during the industry presentations on Monday and Tuesday. The fun of GO-WV's Annual Summer Meeting takes place August 4-6 and you won't want to miss the good times awaiting you!

Please see the forms on page 20 and 21 to register or visit www.gowv.com by July 20. Room reservations at The Greenbrier are due by July 4.

For those not participating in golf or other sporting events on Tuesday, come get creative and have fun while designing and making your own, one-of-a-kind bracelet! Artist Connie Gottshall will offer guidance and suggestions to help you build a breathtaking piece to enjoy for years to

come! The cost is \$200 per person and lunch is included. Meet in the Crystal Room at noon.

Golf tee times are available Sunday morning from 11:07 to 11:37 a.m. on the Meadows Course.

Sunday evening is the western-themed welcome reception and banquet atop Kate's Mountain. Come enjoy our traditional buffet of lobster and filet mignon. The Josh Stewart Band will be providing entertainment for this popular and casual event.

Industry presentations and business session begin on Monday from 9:00 to 11:00 a.m. in the

Summer meeting

Science Teacher Workshop and summer activities

GO-WV recently conducted its sixth Science Teacher Workshop in Morgantown, WV on June 5th and 6th. Thirty-seven middle and high school math and science teachers from around West Virginia attended. They were given a tour of WVU’s Petroleum and Natural Gas Engineering (PNGE) school and labs. Sam Ameri, Chairman of the PNGE, and other professors in the program did an outstanding job of introducing the science behind our industry. Many teachers commented on how much they enjoyed the tour and how it changed their perspective on our industry and the efforts we make to assure safety and address environmental stewardship.

This year’s group of attendees were very interactive and I am very thankful to those teachers who participated and wanted to learn about what we as an industry do and are doing. At the conclusion of the workshop, the teachers were given the opportunity to earn master’s credit hours from Marshall University in exchange for applying the curriculum learned at the workshop into their classroom. Nearly all the teachers signed up for this opportunity.

As always, I want to thank Charlie, Jordan and Katie for their help in this effort. However, I want to especially thank Lori and Program Chair, Jim Crews for putting together a fantastic agenda for the workshop. Lastly, I’d like to thank Maureen Miller who acts as our teacher liaison for this program throughout the year. Maureen teaches at George Washington Middle School in Putnam County and vets the curriculum proposed by the teachers for Marshall to ensure that it meets all the necessary guidelines and criteria.

As we enter the heart of summer, please don’t forget to mark your calendars and register for the upcoming safety meetings July 9th (Charleston) and July 11th (Bridgeport) and in conjunction with the WVU Safety Extension Service.

Also, if you have not done so, please register for the Summer Meeting August 4th-6th at The Greenbrier. Personally, I call it GOWV’s “Superbowl Event”, and we are expecting another record crowd this year. Great meetings rely on great sponsors, so if you are able, please consider sponsoring this once-a-year event as well.

I say it often, but please know that I am honored to be your President and am grateful to work with such amazing people throughout the industry. Our industry continues to keep the planet moving forward and does so with all stakeholders in mind and I am happy and honored to be a part of it.

2023-24 OFFICERS

President:

Jeff Isner

Vice President:

Jim Crews

Secretary:

Jason Harshbarger

Treasurer:

Kelly Moss

Past President:

Maribeth Anderson

BOARD MEMBERS

John Bane, EQT

Craig Colombo, Hope Gas

Scott Freshwater, Reserve Oil & Gas

Stephen Furbacher, Williams

Brett Loflin, Northeast Natural

Energy

Doug Malcolm, D. C. Malcom, Inc.

Aaron Thompson, TC Energy

Ben Sullivan, Diversified Energy

Chris Weikle, Southwestern Energy

Marlin Witt, Baker Tilley, US, LLP

Robert Orders inducted into WVU's "Order of Vandalia"

For their loyalty and service to West Virginia University, six Mountaineers will be inducted into the *Order of Vandalia* during a June 7 ceremony.

The 2024 inductees were Robert Orders along with Patricia Bibbee, Sue Day-Perroots, Mike Fulton, Ranjit K. Majumder and Sophia Peterson.

Robert Orders, a University alumnus and registered professional engineer, is CEO of Orders Construction which was founded in 1964 primarily as a bridge contractor. It has since expanded its scope of service to include industrial/mechanical construction, heavy highway construction and utility construction in multiple states. He is a current member of the WVU Foundation Board of Directors.

Other inductees were:

- Patricia Bibbee, a Pittsburgh native and successful interior designer.

- Sue Day-Perroots, a native West Virginian focused on serving the state through education.
- Mike Fulton, a University alumnus, who manages the Washington office for Asher Agency, a full-service public relations, marketing and advertising agency.
- Ranjit K. Majumder has conducted psychophysiological research on brain damage and sleep disorders throughout his career which has included work as a research associate in what is now the WVU School of Medicine Department of Behavioral Medicine and Psychiatry.
- The founder and former director of the International Studies program, Sophia Peterson taught and conducted research on international relations and news coverage along with global issues for decades.

The induction ceremony will also honor the memories of three Vandalianes who have died in the past year — Billy Lee Coffindaffer, Class of 2005, George Ogden Nutting, Class of 2002 and Don Wilcox, Class of 2008.

The *Order of Vandalia* dates back to 1960 when WVU President Elvis J. Stahr outlined his idea for a special honor to be bestowed on the University's most loyal servants. Inductees through the years have included U.S. Sens. Robert C. Byrd and Jay Rockefeller, Carolyn Eberly Blaney, Joseph Gluck, John T. Chambers, Earl L. Core and Milan Puskar.

From the Burd's Nest: 2024 IOGCC Stewardship Award Forms Ready

This time each year, the Interstate Oil and Gas Compact Commission (IOGCC) initiates its process of soliciting nominations for its annual “Chairman’s Stewardship Awards.” These awards represent the IOGCC’s highest honor for exemplary efforts by the oil and natural gas industry in environmental stewardship. This year, the 2024 winners will be honored by IOGCC Chairman, Wyoming Governor Mark Gordon, at the IOGCC Annual Meeting and the Cheyenne Mountain Resort, in Colorado Springs, CO, October 28-30, 2024.

The IOGCC is an organization with a rich 89-year history of advocating for sound oil and natural gas environmental policy. To recognize and incentivize organizations that go beyond legal mandates to protect and enhance our natural resources, in 2001, the IOGCC created the “Chairman’s Stewardship Awards.” The awards recognize achievement, and challenge organizations, companies and individuals—nationwide—to demonstrate innovation, dedication and passion for our environment.

Applying is easy. You may apply on your behalf or nominate another project. Past winners are even encouraged to apply with new projects. If you have applied in the past and you feel your project has been enhanced, the IOGCC encourages you to resubmit your project. Nominations are due by COB, **Friday, August 16, 2024.**

Representing 38 states, the IOGCC champions the conservation and efficient recovery and storage of domestic oil and gas resources while protecting human health and safety and the environment.

In the nomination form you will find the four different categories. You can enter a nomination for one or in all categories, by providing a brief project summary. Please try to limit your summary to three pages or less.

Here are the four award categories:

- **The Environmental Partnership Award**

recognizes innovative projects led by non-industry organizations with the cooperation and participation of industry.

- **The Energy Education Award** is presented to a group or an organization that has created a program to educate the public about oil and natural gas and the hundreds of ways it affects the lives of Americans each day.
- **The Small Company Award** recognizes an innovative project by a small oil and natural gas company that demonstrates positive environmental stewardship. Small companies are those that operate in a limited area or region.
- **The Large Company Award** recognizes an innovative project by a large oil and natural gas company that demonstrates positive environmental stewardship. Large companies are those that operate nationwide, and in many instances, internationally.

[Click here](#) to submit a project.

As a past chairman of the IOGCC’s Public Outreach Committee’s “Chairman’s Stewardship Awards” subcommittee, I strongly encourage you to find out more about the awards, the process for applying, and past award winners. For more information on the “Chairman’s Stewardship Awards,” please contact Amy Childers at amy.childers@iogcc.state.ok.us.

Good luck on reaching the podium with Governor Gordon in October in Colorado Springs!

Fueling minds: GO-WV 2024 Science Teacher Workshop

In early June, the Gas and Oil Association of West Virginia (GO-WV) hosted its annual Science Teacher Workshop series in Morgantown, where they hosted 40 teachers from across the state and shared with them tools and knowledge necessary to integrate energy-related concepts into the classroom.

What Happened:

The annual event, hosted in Morgantown for the first time since its inception, works to bolster energy education by connecting science curriculum to energy uses across the supply chain.

The two-day workshop included a day trip to West Virginia University's Statler College of Engineering and Mineral Resources, where the teachers were able to tour the rig floor simulator and the Lane Innovation Hub's makerspace and service center. Seven comprehensive sessions provided curriculum, resource materials, lesson plans, and engaging activities for teachers to reference throughout the school year.

Why it Matters:

Educating West Virginia teachers about the natural gas industry generates benefits that ripple through both our education system and commu-

nity at large. By equipping these educators with a comprehensive understanding of the natural gas sector, we enable them to integrate relevant, up-to-date knowledge into their curriculum and better educate the upcoming generations about our industry.

This, in turn, creates informed discussions amongst educators and more well-rounded students, bridging the gap between academia and industry and allowing these students to explore potential future career paths in the industry.

"Our goal with the Science Teacher Workshops is to empower teachers with the knowledge and skills needed to educate the next generation of energy leaders," explained Jim Crews, GO-WV Vice President and MPLX Vice President of Business Development. "By bridging the gap between science education and the energy industry, we provide the resources opening students up to career opportunities in West Virginia's rich energy industry."

When we foster relationships with our educators, we create a direct line of communication that assists in cutting down misinformation and allows

Freedom takes courage and oil

June was the 80th anniversary of the D-Day invasion, the largest naval, air and land operation in history. Its success created a path to victory for the Allies 11 months later. Thousands of Americans died in the invasion and the battles that followed. One cemetery in France contains the graves of over 9,000 Americans. Their average age was 22. A thought-provoking quote I heard, “They gave their tomorrows for our today.” Our soldiers fought and died for parents, spouses, children and future grandchildren they would never see. Two of my uncles were in the D-Day invasion. Fortunately, both made it home to their families.

I knew of my uncles’ D-Day participation as a child without ever understanding the reality. We played “army” in the woods and only thought about the glory of war. I regret never having an adult conversation with my uncles to understand better what they went through before they passed. It’s hard to imagine exiting a landing craft and wading to the beach without cover and under enemy fire. I admire the bravery of all the troops. They realized they might never see their family again. Still they fought on. It’s embarrassing to think, in high school I feared possible rejection when calling a girl for a date.

Freedom isn’t free. Many of the troops on D-Day paid the ultimate price. Even those who came home were changed. Many suffered physical and mental wounds of war. PTSD wasn’t well understood. Some turned to alcohol. Dad had nightmares his entire life. He would fling his arms and start kicking. It scared Mom. She jumped out of bed. Dad never talked about his combat in the Pacific during WWII. In his book from the Marines, we saw photos of the battles he was in. As an adult it gave me a better understanding of him, including his high blood pressure. He died with fragments from a grenade still in his body.

D-Day impacted those at home whose husbands, sons and friends were in the invasion. Many learned by telegram their loved one wasn’t com-

ing home. Some children never got to know their father.

This is a good time to retell a story I wrote about last year. The D-Day invasion required oil and a lot of it to fuel ships, tanks and airplanes. Only the British Air Force stood between Hitler and an invasion of Britain. German U Boats roamed the north Atlantic taking out American ships hauling oil to Britain for fuel, lubrication, light, heat and refrigerated medicines. Hitler understood the importance of oil. Germany had very little. They were able to turn their coal into liquid fuel, a time-consuming process. For oil, Hitler invaded North Africa, Middle East countries and Russia.

Britain had one oil field, in Sherwood Forest, the same forest where the stories of Robinhood and his merry men came from. Darcy Exploration, a British company was drilling oil wells. It took them 5-8 weeks to drill and complete a single well. At this rate they could never produce enough oil to fuel the British Air Force. Phillip Southwell, a Director for Darcy Exploration knew he needed help and flew to the USA to get additional drilling rigs and crews. In Oklahoma he met with Lloyd Noble who owned a drilling company. Lloyd refused because his rigs were busy drilling wells to produce oil for the American war effort.

Southwell’s persistence convinced Noble to put together four rigs. He gave Gene Rosser, a leader with experience, the role of leading the project. They found an expert in logistics to be Gene’s assistant and 44 roughnecks to man two 5-man crews per rig. The goal was to drill 100 wells in a year. Germany had spies all over the USA. This project was TOP SECRET. If the Germans learned of it they could keep the crews and rigs from getting to Britain. The Germans would bomb the drilling sites if they learned of them. The 46 men only knew they were going to Britain but not where. The equipment was all painted green to blend in with the forest. Lighting at night was minimal and had to be directed downward.

WeatherBELL: Early cooling season forecast

For more information about WeatherBELL's services and to get the hot-off-the-press forecast updates, please visit our website www.weatherbell.com or contact us at sales@weatherbell.com.

After a hot start to summer, more of the same is expected from July to September.

The wildcard is the Atlantic Hurricane season which is expected to be one for the records books. Since December we have been calling for near-record activity, and now most other forecasters and agencies have come on board.

With Atlantic sea surface temperatures so warm and the threat of tropical storms and hurricanes, increasing chances of heavy rainfall across the Southeast from August into September can keep areas locally cooler, but northern zones are expected to continue to be hot.

Get your GO-WV license plate now!

GO-WV celebrates WV's birthday with the Black Bears

The Gas and Oil Association of West Virginia, Inc. (GO-WV) sponsored Black Bears MLB Draft League game on Thursday, June 20, to celebrate West Virginia Day.

We would like to thank the GO-WV members and their families for joining our celebration!

The photos on this page and the next show some of the highlights of the outing, including Case and Cohen Isner, sons of GO-WV President Jeff Isner, throwing out the first pitch(es)!

One Darcy rule was to change the drill bit every 30 feet no matter what. A very time-consuming process requiring all the drill pipe to be taken out of the well. American decisions on when to change a drill bit were made by men in the field. The Americans stunned the Brits by drilling 1,000 feet the very first day. American crews initiated other efficiencies and drilled wells in 7 days per rig instead of Darcy's 5-8 weeks per rig.

The Americans drilled 106 wells in a year producing over 3 million critical barrels of oil to keep the British Air Force flying. The Americans didn't know about the planned D-Day invasion. The oil they produced made it possible. Following D-Day a pipe was run across the English Channel carrying British oil into France to fuel the Allied armies allowing them to march to Berlin. Oil was important for freedom then. It is still important today. For more information, Google "PBS Sherwood Forest."

Our industry is facing many challenges. Sometimes we get frustrated. It might be good to remember the largest naval, air and land operation in history was made possible by 46 Americans who risked their lives to drill 106 wells in a year. The oil they produced fueled the Allies march to Berlin to help end World War II.

Today our military still needs oil and natural gas. Some in the zeal to get rid of fossil fuels neglect the consequences. Russia, China and Iran would love to see the USA get rid of fossil fuels. Restrictions on U.S. oil and gas can drive up world oil prices. Russia and Iran's main source of revenue to finance things like the war in Ukraine or terrorist attacks like the October 7th Hamas attack on Israel is oil revenue.

Freedom isn't free. Our forefathers put their lives on the line for freedom. We must do our part by having the courage to tell the truth about energy even if it is uncomfortable. Eighty years ago, 46 oil and gas men fueled the D-Day invasion. We have a great story to tell. The world needs to hear it.

TPS ALERT
A TEAM PROFESSIONAL SERVICES COMPANY

WV teachers to learn firsthand how the industry works.

“I am thrilled to have participated in this year’s Science Teacher Workshop. It is a unique opportunity for STEM educators to expand their teaching practices with real-world references,” said Maureen Miller, George Washington Middle School teacher. “I look forward to implementing these new resources and activities in the classroom to further engage and inspire our students to pursue STEM and energy-related careers.”

Above, Rick Smith answered questions from teachers after the group dinner on first day of the Science Teacher Workshop.

Below, GO-WV Vice President and Program Chair Jim Crews and GO-WV President Jeff Isner enjoy their time with the teachers.

Above, some of the driving forces in WVU engineering and GO-WV combine to host this year's Science Teacher Workshop. From left are: Professor Kashy Aminian, teacher Maureen Miller, GO-WV Director of Administrative Services Lori Miller Smith, Professor and Dept. Chair Dr. Sam Ameri and Dean Pedro Mago.

Above and below, teachers learned from various industry speakers about all facets of the oil and gas industry, from formations to transportation during the two-day Science Teacher Workshop in Morgantown on June 5 and 6.

Jonathan Morgan (Unconventional) has over 11 years of leading operational and product teams globally across industries and has served as Chief Operating Officer of Jay-Bee Oil & Gas for the last two years. Jonathan's grandfather founded Jay-Bee Oil & Gas, and Jonathan has served many roles at Jay-Bee Oil & Gas throughout his life as the company grew. Most recently he was instrumental in modernizing the internal budgeting and forecasting as well as KPI reporting across operational areas. Prior to Jay-Bee Oil & Gas he successfully built and developed teams across military, technology and oil and gas sectors. His last role was as a Product Manager at Google, launching cybersecurity, hardware and health products to billions of users. In addition, he has founded and worked with several startups, currently serving in multiple board and advisory roles.

Jennifer Vieweg (Conventional) is Director of Strategic Initiatives and Corporate Citizenship at Greylock Energy. Prior to joining Greylock, she served as Corporate Affairs Manager with Energy Corporation America. She also worked 12 years with Charles Ryan Associates, a Charleston, W.Va.-based strategic communications firm, where she served as Vice President of Client Service. Vieweg holds a Bachelor of Science degree in Communications: Advertising from Florida State University, a Master of Arts degree in Communication Studies: Organizational Communication from Marshall University and a Doctorate of Executive Leadership from the University of Charleston. She is an adjunct professor with Wake Forest University and has also taught at the University of Charleston. Vieweg is

past-president of the YWCA-Charleston board, a member of the executive board for the Chemical Alliance Zone, GO-WV communications vice-chair and is active in a number of other industry and community organizations.

Pipeline Sector - Gathering

Nick Munoz leads Williams Safe, Reliable, and Efficient Gathering and NGL Transmission Operations in Ohio, West Virginia, and Pennsylvania. He has 19 years of experience in Upstream and Midstream Operations in US Gas Basins, with over a decade of experience in the development of the Marcellus and Utica. In that time, he has led operations teams, asset commissioning teams, engineering teams, integration teams, and most recently served as Director of Technical Services for all Gathering and Processing assets nationwide. He holds an MBA with Finance Specialization from LSU-Shreveport, a BAAS from TAMU-Commerce, and an AAS in Instrumentation and Controls Technology from San Juan College.

Pipeline Sector - Interstate Pipeline

Aaron Thompson supports External Relations efforts on behalf of TC Energy across the eastern United States. Aaron previously served in Kentucky's Office of the Governor and Department for Local Government as a Field Representative and Executive Director following his time as a Director of Special Projects working for a member of US House of Representatives. A graduate of the University of Kentucky, Aaron joined TC Energy in mid-2020 and resides in northeast Kentucky with his family. He serves on the board of the Ohio Oil and Gas Association and the Gas and Oil Association of WV. He currently serves as GoWV's Chair of the Education and Communications Committee.

General Member

Kelly Moss was a founding partner in Apex Pipeline Service, Inc. in 2006 and has served as President/CEO since inception. He was previously the Secretary/Treasurer and COO for S T Pipeline, Inc. from 1996 through 2005. Prior to that time, he worked for Columbia Gas Transmission from 1994 through 1996. From 1986 to 1994, he worked for various PVF wholesalers as a salesman and sales manager and worked for Bell Mechanical as an estimator. Moss is active in many industry associations and is often used by industry leaders to gain a contractor's point-of-view on many issues. He was active in WVONGA for a number of years before joining GO-WV. He graduated from South Charleston High School in 1984 and attended Marshall University from 1984 to 1987. He is married and has two children.

Andria Alvarez Wymer is the Director of Strategic Initiatives and Planning for Applied Construction Solutions and Energy Transportation, LLC based in Bridgeport, WV. As the third-generation member of the family businesses, she develops and oversees programs and projects to advance company goals. Wymer is active as an ex-officio member of the GO-WV board of directors and serves as the Vice-Chair of the Environmental and Safety Committee. Additionally, Wymer is an active member of the ABCWV, CAWV, WEN WV and the WVU Cancer Institute Leadership Council. Alvarez Wymer is a 2013 graduate of WVU where she received degrees in Public Relations and Multidisciplinary studies, followed by her MBA in 2014. She is a member of the 2020 Generation Next 40 under 40 class and Women Leaders in the Construction Industry by the CAWV in 2018.

Eisenhower Room. Guest speakers will include industry and government leaders.

Monday is filled with sporting events, as well, with something for everyone.

- The morning begins with the men's and women's doubles tennis tournament from 9:00 to 11:30 a.m. at the Tennis Club.
- The Trap & Skeet Tournament will take place at The Greenbrier Gun Club on Kate's Mountain Monday, August 5, with shooting times available from 9:30 a.m. to 5:30 p.m. Practice times will be available on Sunday. Please call (800) 624-6070 to make practice and tournament reservations at the Gun Club.
- Golf tee times are available Monday on the Meadows Course from 11:07 a.m. to 12:17 p.m.
- The mixed doubles tennis tournament takes place from 1:30 to 4:00 p.m. Monday at the Tennis Club.

Monday evening features dinner on your own. Following dinner, wear your GO-WV badge and head to the casino for our After Dinner Reception at 8:30 p.m. The Casino Night fun will feature a private GO-WV bar and the opportunity to enjoy an evening of your favorite casino games. Music and dancing are also available.

Tuesday begins with our second set of industry presentations from 9:00 to 11:00 a.m. in the Eisenhower Room. Guest speakers will again include industry and government leaders.

The Pickle Ball Tournament at the Tennis Club takes place from 8:30 to 11:30 a.m. No reservations needed.

The Trap & Skeet Tournament enjoys its second day of competition from 9:30 a.m. to 3:30 p.m.

The shotgun-start golf tournament will take place on the Old White course Tuesday, August 6, beginning at 12:30 p.m. To sign up for the tournament, please contact Jake Fullerton at (304) 536-7851 or jake_fullerton@greenbrier.com.

Your Summer Meeting adventure concludes Tuesday evening with an awards reception at the Outdoor Pool from 7:00 to 8:00 p.m., followed by a New Orleans-style dinner from 8:00 to 10:00 p.m. This special evening will conclude with music, dancing and fireworks!

To make reservations for Trap and Skeet, call 1-800-624-6070.
