

## Tax Seminar date changed to November 6

The Gas and Oil Association of WV, Inc., along with the Pennsylvania Independent Oil and Gas Association and the Southern Ohio Oil and Gas Association, are sponsoring the 2024 Oil and Natural Gas Accounting and Tax Seminar from 9:00 a.m. to 4:00 p.m. on November 6, changed from November 7. It will be a virtual event.

Oil and natural gas companies continue to face ever-changing economic conditions and new challenges that come with it. In a continuing effort to keep members of the oil and natural gas industry informed of current issues and to help them navigate these challenges, we have once again partnered with Baker Tilly US to present this important and timely information.

Those who should plan to attend are oil and gas investors, operators, royalty owners, service companies, accounting and legal professionals.

Attendees are expected to receive 7.0 CPE credits. CLE credits are available by self-re-

porting to the appropriate state bar association. Time will be allotted for questions during the seminar and the presenters will be available for questions and consultations by phone or email after the seminar.

The following important and timely topics are on the agenda:

- General Tax Updates for 2024 – Federal and State, including issues now being addressed in Congress, and at the individual state levels.
- Oil & Gas Industry Tax Updates for 2024
- Structuring deals from a tax perspective
- Purchase/Sale, Valuation, Succession and Estate Planning
- IT Security

Committee*

## Plan now to attend 2025 Winter Meeting

The Gas and Oil Association of WV, Inc. (GO-WV) will host its annual Winter Meeting on February 19-20, 2025, at the Marriott Town Center Hotel in Charleston. Make plans now to join friends, colleagues, legislators and professional contacts for this worthwhile and exciting two-day event. Mark your calendars and register now [online](#) or use the forms on pages 18 and 19.

To better benefit your business, take advantage of the sponsorship opportunities that are available. Simply fill out the sponsor form on page 18 or contact Lori Miller Smith for specific event sponsorships. The positive exposure, educational and networking opportunities make this a great investment for your company.

Wednesday is slated to feature a panel discussion on employment law, plus other important and

useful topics for our industry and its companies and workers. The morning will also feature a Producers' Issues Committee Breakfast, open to committee members only.

At 5:00 p.m. we will welcome legislative leaders to a special reception with GOpac contributors. This is followed by the GO-WV Membership and Legislative Reception at 6:00 p.m. which is open to all registered attendees.

On Thursday, breakfast for all attendees begins at 8:00 a.m., prior to the 9:00 a.m. conference opening. Special invited guest speakers include

# Can we learn lessons from the Sunshine State?

A funny thing happened on the Enviro’s path to rid the world of evil fossil fuels and eliminate carbon dioxide (plant food) from the atmosphere. Of course, all of this is in the name of saving a planet that has been taking care of itself for 4.5 billion years without any help from man who didn’t show up until about 10,000 years ago. It seems that the free market has again reared its ugly head.

As a recovering Petroleum Engineer, I can’t write or talk without drawing a graph or referencing the quadratic equation so I’ve introduced the following graph to illustrate the subsequent points.

**Figure 1:**  
Electricity demand growth vs. real GDP growth index (2000 = 100)

Up until 2000, when we ceded most of our US manufacturing to the Asia Pacific rim, American Gross Domestic Product (GDP) growth and electricity demand grew in lock step. The burgeoning service economy and efficiencies in appliances ushered in a divergence in that relationship that has existed until today. However, if a recent electricity capacity auction is any indication, we are now at the precipice of an explosion in electricity demand in the United States. When you couple that with the obsession with windmills and solar panels, including the 45Q tax credits for those intermittent sources of power, we find ourselves in a quandry.

Unless you’ve been hunkered down in an Israeli Defense Force (IDF) air raid shelter for the last year, the impetus for that increased demand is the explosion of artificial intelligence (AI) and the planned construction of data warehouses that require continuous, reliable power. The two largest utilities in West Virginia are American Electric Power and Allegheny Power which are members of the Pennsylvania, Jersey, Maryland (PJM) Regional Transmission Organization (RTO). In addition to managing the grid, PJM determines where and what type of electric generation is cited from Chicago to New York City and all points in between, including West Virginia.

Learning from Sunshine State

## Excavator safety training seminars set for Nov. 6 and 7

The Gas and Oil Association of West Virginia (GOWV) is pleased to announce upcoming excavator safety training opportunities.

The seminar is a partnership between WV 811 and OH 811 and will be two Excavator Safety Seminars. These FREE excavator seminars are vital opportunities that provide underground damage prevention education, law updates, industry news and information on Universal Marking Standards. These seminars will include a Q & A segment and provide the opportunity to collaborate with industry professionals from both OH 811 and WV 811. There are many similarities in the dig laws for each state, but there are also some distinct differences. These seminars will provide an overview of each state's laws and highlight the differences for those organizations that may oper-

ate in both. The objective at the end of the session is to increase knowledge and provide resources in an effort to reduce damages across the industry.

The Excavator seminars will take place at the following:

- Wednesday, November 6th  
Grand Pointe Conference Center  
1500 Grand Central Ave., Suite 118  
Parkersburg, WV 26105
- Thursday, November 7th  
The Highlands Event Center  
355 Wharton Circle, Suite 235  
Triadelphia, WV 26059

To register for and/or sponsor the Excavator Safety Seminar, go to [www.OHIO811.org](http://www.OHIO811.org) or call OH811 at 800-311-3692.

## Thanks to our Driver Safety Training sponsors

## From the Burd's Nest: Don't let your vote be lost

In just a few short days, Tuesday, November 5, 2024, registered voters here in West Virginia, and across the nation, will go to their respective polling places and cast their votes for those candidates that best represent their interests. We should all be reminded that the importance and privilege of voting cannot be overstated.

Fortunately for us, the framers of the Constitution of the United States recognized that our government needed to be vested in the people and established our form of government as that of a Republic. As such, we democratically elect our leaders who in turn represent us in the legislative, judicial and executive branches of government. A Republic recognizes the inalienable (absolute or undisputable) rights of individuals. John Quincy Adams, our sixth president said, "Always vote for principle, though you may vote alone, and you may cherish the sweetest reflection that your vote is never lost."

Casting your vote is the same as using your voice!! That is one of the beauties of democratic republic government: every individual is given the right to vote on political, social and economic issues.

Recently, all GO-WV members were sent an email from GOpac, the official political action committee of the Gas and Oil Association of West Virginia. This communication listed 104 candidates that were endorsed for election because of their proven voting record or, in the case of new candidates seeking office, their stated support of protecting and enhancing the interests of the oil and natural gas industry. This full list of candidates can be found on the GO-WV website homepage at: [GOpac Endorses 104 Candidates in 2024 WV General Election - Gas & Oil Association of West Virginia \(gowv.com\)](#)

When you read and study this list, please note that West Virginia has 17 state senatorial districts. Each district has two senators who are elected to serve four-year terms. However, only one senator is elected in each election cycle. So if you do not

see a very friendly and helpful senator listed for endorsement in this election don't panic...those not up for election in 2024 will be up in November 2026. The House of Delegates operates quite differently. There are 100 House of Delegate members who represent the 100 individual House districts. All House of Delegate members are elected to serve two-year terms and, as such, are up for re-election each two-year election cycle.

Also, as you read and study this list, you will discover the GOpac selection committee was very selective in its endorsements. For example, GOpac chose to avoid some Senatorial and House races. This is not uncommon and nearly all such political action committees follow this practice. If you have questions on a particular candidate, or if you wish to discuss the endorsement of an individual not on the list, please call me at your earliest convenience.

In addition, you will find endorsements of two statewide races, as well as three national races. Those are the Governor, Attorney General, US Senate and two US House of Representative races. In accordance with the Association Bylaws, all national and statewide candidate endorsements require a 75% supermajority vote by the Board of Directors.

As someone who spends a great deal of time lobbying, and working with our elected representatives at all levels, I take great pride in getting to know them. And while some of them may disagree with our view on oil and natural gas issues from time to time, I still greatly respect their commitment to service and work to advance the State of West Virginia. It is because of these differing opinions that it is important for you to learn as much as you can about the candidates and find and support those who most closely represent your individual beliefs.

In closing, please remember the ballot you cast for this November 5 General Election is important. In honor of our founding fathers, "use your voice and don't let your vote be lost!"

## Breast cancer awareness: A time for action

Today there are more women working in the oil and gas industry than ever. October was Breast Cancer awareness month. I learned from Lynnda's experience that breast cancer is more pervasive than I thought. Lynnda gave me permission to share her experience in the hope it will save lives by encouraging women to get annual breast exams.

According to the National Breast Cancer Foundation, more than 360,000 people will be diagnosed with breast cancer in 2024. A year ago, these were just numbers until my wife, Lynnda, was diagnosed with breast cancer. They have more meaning to me now because Lynnda is part of the numbers. I shared Lynnda's story with her permission last year at this time. It will be a year this month since her breast surgery. We want to share an update.

Lynnda gets an annual mammogram. It was over a year ago when she found a lump in her breast before her scheduled mammogram. She decided to have it checked out rather than wait. A biopsy (using a small tool to get a sample of the mass) was done. The doctor herself called Lynnda with the result. It was cancer. Not what we wanted to hear. It's scary. The good news was that she caught it early. It was stage one limited to one breast. A PET scan showed it had not spread to the lymph nodes.

The National Breast Cancer Foundation says, when caught in its earliest stages, the five-year survival rate of breast cancer is 99%.

Lynnda decided to have a lumpectomy (breast conserving therapy) removing the lump and surrounding tissue. This was outpatient surgery. There is risk, some cancer cells could be left behind. The surgery went well. Biopsy showed the margins were clear. Lynnda healed quickly from the surgery with no major issues.

At the end of November, Lynnda saw the oncologist who saw no reason for chemotherapy. He started her on a hormone blocker for estrogen and progesterin since cancer feeds on these hormones.

It's a daily pill she will need to take for the next five years. There are side-effects Lynnda learned, like fatigue, muscle and joint pain. She thought this was from aging until talking to other women with breast cancer who were taking the pill and learned it was normal. It's better than the alternative.

With Lynnda's permission I went to all the doctor appointments. Four ears were better than two so we could fully understand what was happening and what the options were. I could ask the doctor my questions directly. First-hand knowledge was important so I could be a good sounding board for Lynnda. It is her body. The treatment decisions are hers.

The same day Lynnda saw the oncologist, we also saw the radiation oncologist. He described the radiation therapy in detail without talking down to us and made the process understandable. He explained how radiation therapy would take care of any rogue cancer cells missed by the surgery. Like any procedure, there are risks. The heart is close to the breasts. Radiation therapy has improved greatly since I had it 40 years ago. Today it is more targeted. They can radiate the parts of the breast required and avoid the heart. The doctor said radiation therapy can reduce cancer recurrence by 50%. Lynnda asked, "What is my chance of recurrence?" He responded, "About 8%." "It would reduce my chances of recurrence from 8% to 4%," Lynnda queried. "Yes," Doc responded and added, "I tell you all your options because some people choose radiation for peace of mind." Lynnda chose not to do radiation therapy.

In April Lynnda had a PET scan and saw the oncologist. Everything was clear. She had her annual mammogram in July and all is well. We met with a nurse at the Breast Center who went over Lynnda's Cancer Survivor Care Plan. She asked a lot of questions and answered ours. Lynnda is also a nurse. They got along well. Lynnda left in good

# WeatherBELL: Heating season overview

*For more information about WeatherBELL's services and to get the hot-off-the-press forecast updates, please visit our website [www.weatherbell.com](http://www.weatherbell.com) or contact us at [sales@weatherbell.com](mailto:sales@weatherbell.com).*

After a very impactful late hurricane season, eyes are now turning to winter. Hurricane seasons that are very active at the end typically correlate to having a major cold stretch in either late November or for parts of December.

A weak La Niña is expected this winter. For the upcoming winter, we expect high variability, especially across northern areas. A persistent Southeast ridge should lead to a milder than normal winter for the Deep South.

Despite the expected fast start, overall for the winter we still expect the coldest air, relative to normal, to be in the Northwest and across parts of Canada. The East Coast could still see some big snowstorms as the pattern shifts back and forth.

The 2024 Oil & Gas Reclamation Award recipients will be honored during lunch and a presen-

tation will be made at that time to the Oil & Gas Museum. Recipients of the Rusty Hutson Heritage Award and the 2025 Gunslinger Award will be honored, as well.

Please see page 19 to register for the meeting, or [www.gowv.com](http://www.gowv.com). If you have questions, please contact Lori Miller Smith at 304-344-9867.

## Tax Seminar

Continued from page 1

This year's presentation will include an update on Tax Reform and updates on not only various

federal, state and local taxes, but will approach each area to explain how oil and gas investors, operators, royalty owners, service companies and professionals should maximize tax and economic benefits. Planning for current and future opportunities and challenges will be emphasized. Baker Tilly presenters will utilize their years of experience in the oil and gas industry to explain key tax benefits as well as standard tax issues that everyone in the oil and gas industry should be aware of and plan for.

After completion of the course, participants will be able to address current accounting and tax issues in the oil and gas industry for themselves and their companies, have increased awareness of IT security issues and maximize their tax benefits.

There are no prerequisites required for this update level course, and no advance preparation is needed for this course recommended for 7.0 CPE credits in the areas of accounting, taxes, information technology and specialized knowledge. CLE credits are available by self-reporting to the appropriate state bar association.

All instructors are provided by Baker Tilly and include: Marlin Witt, Partner, CPA, CFP, CGMA; Bill Phillips, Partner Emeritus, CPA; Tyler Cornell, CPA; Chad Parker, CPA; Jonathan Jones, CPA; and Benjamin Ellis, Director, Technology.

You can [register online](#) or use the form found on page 17 in this issue.

In the past, these decisions were made in Charleston by the West Virginia Public Service Commission (PSC). Today the PSC has the authority to approve costs that are passed on the West Virginia consumer by the PJM, but decisions concerning power generation are made by the PJM. In the most recent PJM capacity auction, which is a solicitation for new power to be added to the RTO in subsequent years, the bids came in at \$270/MW. This price is nine times higher than the 2023 clearing price and is a clear signal that the grid is in need of a massive influx of new generation. A typical natural gas fired power plant burning \$3/MMbtu natural gas can generate electricity for \$21/MW. And if you are concerned about CO<sub>2</sub> emissions, fear not you worshipers of the windmill, natural gas emits about half of the CO<sub>2</sub> of a similar sized coal fired power plant.

I can't believe I'm writing this, but maybe West Virginia could learn a thing or two about the value of fossil fuels and electric generation from Florida, which has been focused on constructing natural gas fired power plants since 1999. In 2023, the "Sunshine State" generated 75% of their electricity from natural gas, not from solar panels made in China. According to an article in the October 4 *Wall Street Journal*, it seems that the Sunshine State makes power generation decisions based on cost and reliability and not on 45Q tax credits. Florida's two largest utilities, Florida Power and Light and Florida Power Corporation, are not members of an RTO. Those vertically regulated utilities go to Tallahassee for all decisions concerning generation, transmission and distribution of electricity. That reality, according to Mario Loyola of Florida International University, results in Florida consumers paying 73%, 40%, and minus 163% of Pennsylvania's, New York's and California's electric rates, respectively. Even "pro energy, GOP-controlled Texas has higher priced electricity than Florida due to its large renewable energy sector." Loyola goes on, "Meanwhile, virtually all large new nuclear and gas capacity being proposed is in non-RTO areas that still have vertically integrated utilities, chiefly Florida." West Virginia, which produces three trillion cubic feet of natural gas per annum, should get on the natural gas fired power generation bandwagon, now.

TPS ALERT  
A TEAM PROFESSIONAL SERVICES COMPANY

spirits. It is a year since surgery and she is cancer free. We are blessed. But vigilant. Lynnnda maintained a positive attitude throughout the ordeal. Our faith, family, church family and support of friends from all over the world have been partners on the journey and there when we needed them.

Cancer and side effects haven't stopped Lynnnda from living life and doing what she wants to do. If she gets tired she takes a nap. We traveled more than usual in the past year with multiple trips to Disney World with family. One change at Disney, Lynnnda now drives a mobility scooter. I have to keep up with her. We traveled to Germany in March on Shale Crescent business and are working with several of the contacts made. We traveled to Iceland for pleasure.

Lynnnda worked the trade show booth with us at the National Plastics Expo in Orlando and at Select USA in June where she made several key contacts who are now prospects interested in coming to the Shale Crescent USA region. Having a purpose is important, especially when fighting cancer.

How pervasive breast cancer is surprised us. Many relatives, friends, acquaintances and to-

tal strangers who read this column let us know they now have or have survived breast cancer to encourage Lynnnda. They are survivors. The National Breast Cancer Foundation reminds us early detection is only possible through action like regular mammograms. There is still work to be done. Support of breast cancer organizations and research is important. October is a good month to raise awareness. Our high school soccer team wore pink warm-ups in October. Get involved. Join the cause. More information is available at [www.nationalbreastcancer.org](http://www.nationalbreastcancer.org).

Lynnnda and I hope sharing her story will help you or someone you love. Everyone's journey is different. We never know when a disease like cancer will strike us or a loved one. Don't put off until tomorrow or next year what you can do today. We visit our children and grandchildren at every opportunity. We have a trip to Disney World and *Mickey's Christmas Party* planned for November with our grandson, his wife and our great-grandson. Cancer reminds us not to take each other and life for granted. Appreciate each day as the gift it is!

	<b>Business card</b> 1 column (4 5/8" wide x 2" deep)	\$300.00/mo	\$250.00/mo	\$250.00/mo

GO-WV wants to assure that you get the best quality advertisement in the newsletter for your advertising dollar. To that end, we ask that you **submit your color ad electronically in a 300 dpi (dots per inch) resolution JPG or PDF format**. Ads saved as Word or Word Perfect documents or Excel spreadsheets will not give you a quality ad in the publication. If there are conversion issues with your file, our designer will contact you directly. Ads must be emailed directly to Diane Slaughter: [dslaughter@gowv.com](mailto:dslaughter@gowv.com).

Ads can be run each month throughout the year or in any combination of months you choose. Please note there is a price break when you commit to a longer contract. Changes to your ad copy or cancellations can be made during the duration of the contract, but must be submitted 30 days prior to the next publication. (i.e, February 1<sup>st</sup> for the March issue). Please complete the information requested below and return this page, with payment, to **GO-WV Newsletter, GO-WV, 300 Summers Street Suite 820, Charleston, WV 25301**; email [dslaughter@gowv.com](mailto:dslaughter@gowv.com). Ads must be paid in full by check or credit card prior to publication. Please call Diane Slaughter at (304) 984-0308 to discuss these options.

**About this course:**

**Program:** Oil and Natural Gas Accounting and Tax 2024; **CPE Credits for Accountants:** 7.0; **Field of Study:** Accounting (1.0); Taxes (3.0); Information Technology (1.0); Specialized Knowledge (2.0). After the seminar is completed please report completion of the activity within 30 days through the WV State Bar Membership portal at [www.mywvbar.org](http://www.mywvbar.org).

**Course Name:** 2024 Annual Oil and Gas Tax and Accounting Seminar; **Course Date:** 11/07/2024.

**Instructors:** Marlin Witt, Partner, CPA, CFR, CGMA; Bill Phillips, Partner Emeritus, CPA; Charlene Tenney, Supervisor, Business Outsourcing; Chad Parker, CPA; Jonathan Jones, CPA; Benjamin Ellis, Director, Technology. **Instructional Delivery Method:** Webinar; **Program Level:** Update; **Prerequisites:** None; **Advanced Preparation Needed:** None; **Who Should Attend:** Oil and gas investors, operators, royalty owners, service companies and professionals; **Program Description:** This year's presentation will include an update on Tax Reform and updates on not only various federal, state and local taxes, but will approach each area to explain how oil and gas investors, operators, royalty owners, service companies and professionals should maximize tax and economic benefits. Planning for current and future opportunities and challenges will be emphasized. Baker Tilly presenters will utilize their years of experience in the oil and gas industry to explain key tax benefits as well as standard tax issues that everyone in the oil and gas industry should be aware of and plan for; **Learning Objectives:** After completion of the course, participants will be able to address current accounting and tax issues in the oil and gas industry for themselves and their companies, have increased awareness of IT security issues, and maximize their tax benefits.

 Baker Tilly US is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE Sponsors. State boards of accountancy have final authority on the acceptance of individual courses for CPE credit. Complaints regarding registered sponsors may be submitted to the National Registry of CPE Sponsors through its website: [www.nasbaregistry.org](http://www.nasbaregistry.org).
