

GOWV Winter Meeting 2026

Charleston WV

January 21, 2026

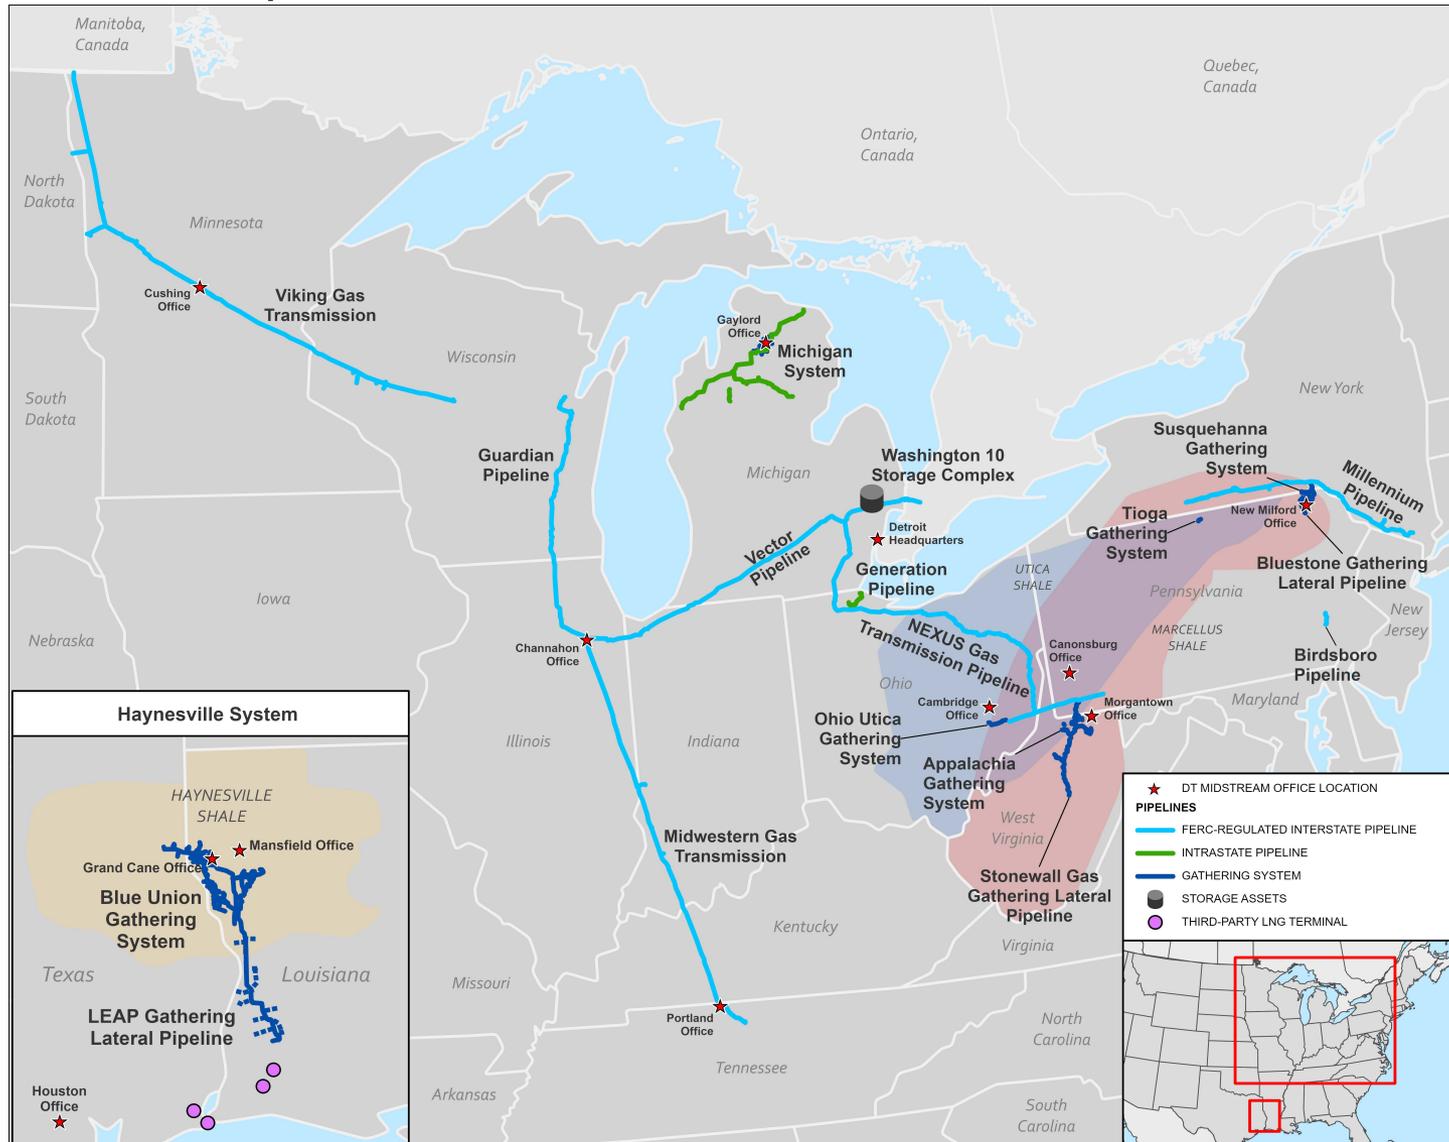

DT Midstream Overview

DT Midstream is an owner, operator and developer of natural gas midstream interstate and intrastate pipelines; storage and gathering systems; and compression, treatment and surface facilities. We provide clean, natural gas to gas and electric utilities, power plants, marketers, large industrial customers and energy producers across the Southern, Northeastern and Midwestern United States and into Canada.

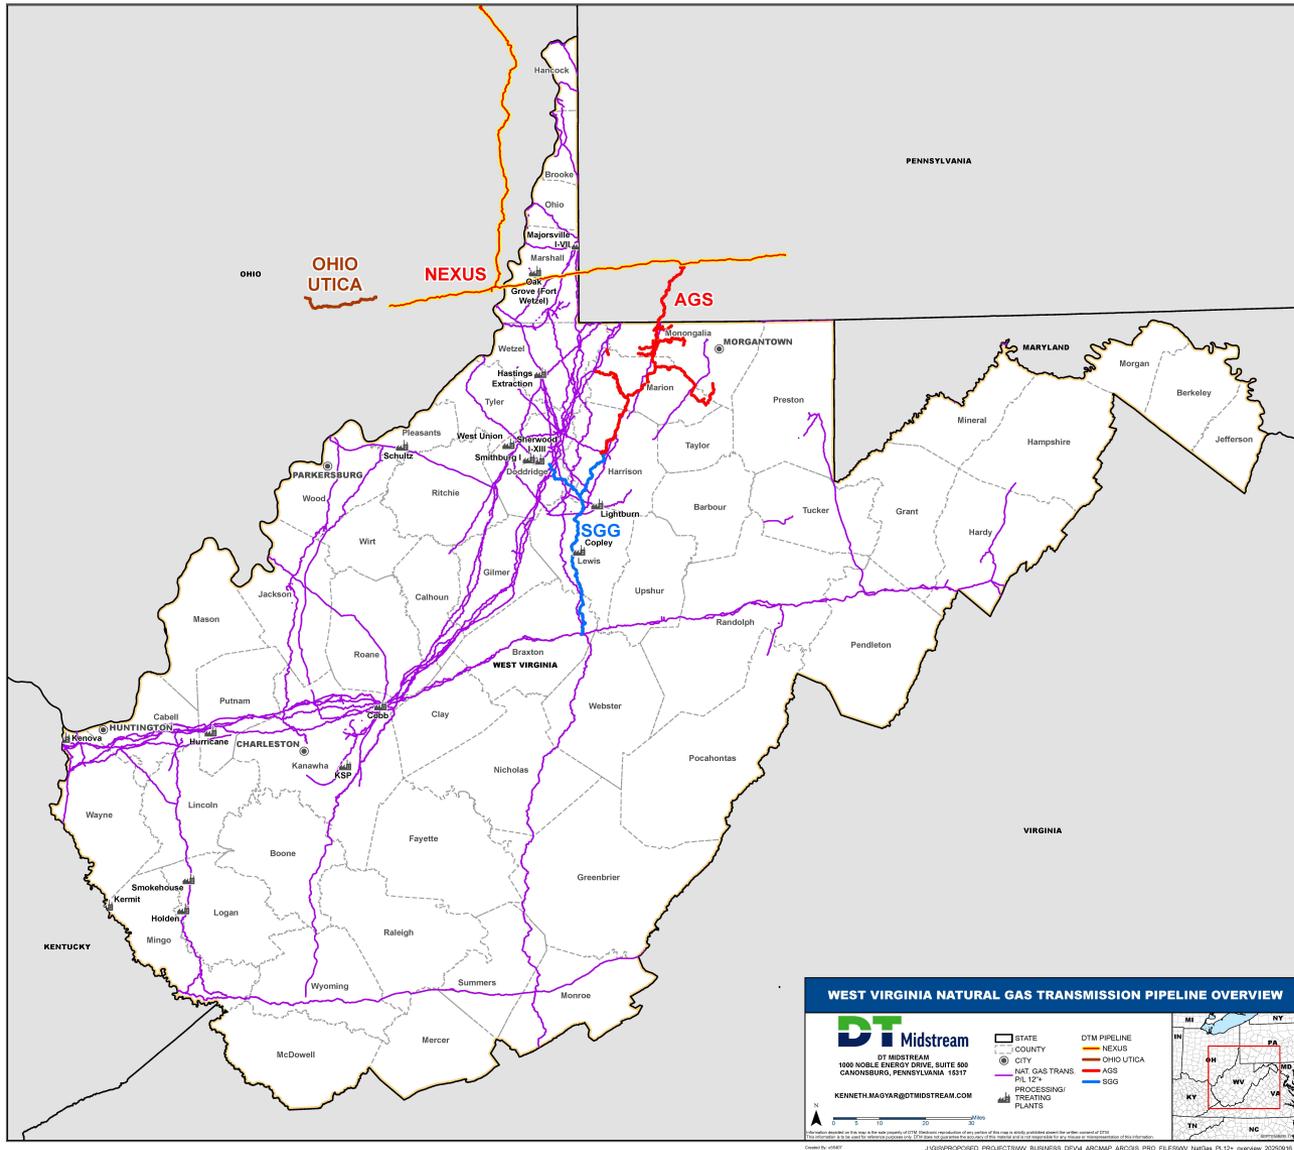

We offer a comprehensive, wellhead-to-market array of services, transporting production from world-class, low-cost dry gas formations to growing, high-quality markets.

- DTM (NYSE: DTM) became a public company in July 2021, after spinning off from DTE Energy
- ~\$15 Billion in enterprise value and employs ~600 people
- 2,200 miles of FERC-regulated interstate pipelines with interconnections to multiple interstate pipelines and local distribution companies located in growing demand markets; 700 miles of lateral pipelines;
- Natural gas storage assets with capacity of 94 Bcf; and
- More than 1,000 miles of gathering pipelines in the premier dry gas basins in the country
